掠奪性期刊是什麼？

維基百科指出：掠奪性出版集團（predatory publishing）

，是指這類學術出版商是為了**學術灌水**或**以此牟利**而組織發表大量**低品質**的「學術會議和期刊」。這類出版商藉由對作者收取高額の版面費，略過專業的學術編輯和審查機制，以花錢就能發表的特點大量吸引有發表論文壓力或者想累積國際研討會經歷的學者在這些期刊上發表論文，或者誤導不知情的學者投稿，並以此獲利。**Beall's List**是Jeffrey Beall在2017年1月之前定期更新的報告，列出掠奪性出版物分類的準則，並且列出符合該準則的出版商及獨立期刊。不過Jeffrey Beall自2017年1月起已不再發布Beall's List。有說法指出，開發中國家的新進學者有成為這類出版模式受害者的風險。

Who's Jeffrey Beall?

From Wikipedia: Jeffrey Beall is an American librarian and library scientist, best known for drawing attention to "predatory open access publishing", a term he coined, and for creating what is now widely known as Beall's list, a list of potentially predatory open-access publishers. He is a critic of the open access publishing movement and particularly how predatory publishers use the open access concept, and is especially known for his blog Scholarly Open Access. He has also written on this topic in The Charleston Advisor, in Nature, in Learned Publishing, and elsewhere.

When Beall created his list, he was employed as a librarian and associate professor at the University of Colorado Denver. More recently, he was a librarian at Auraria Library in Denver until March 2018.

Potential predatory scholarly open-access publishers

Instructions: first, find the journal's publisher – it is usually written at the bottom of the journal's webpage or in the "About" section. Then simply enter the publisher's name or its URL in the search box above. If the journal does not have a publisher use the [Standalone Journals](#) list.

All journals published by a predatory publisher are potentially predatory unless stated otherwise.

Original list

WORLD VIEW

A personal take on events

J. SANCHEZ

Predatory publishers are corrupting open access

Journals that exploit the author-pays model damage scholarly publishing and promote unethical behaviour by scientists, argues Jeffrey Beall.

When e-mail first became available, it was a great innovation that made communication fast and cheap. Then came spam — and suddenly, the innovation wasn't so great. It meant having to filter out irrelevant, deceptive and sometimes offensive messages. It still does.

The same corruption of a great idea is now occurring with scholarly open-access publishing.

Early experiments with open-access publishing, such as the *Journal of Medical Internet Research* and BioMed Central, were very promising. Set up more than a decade ago, they helped to inspire a social movement that has changed academic publishing for the better, lowered costs and expanded worldwide access to the latest research.

Then came predatory publishers, which publish counterfeit journals to exploit the open-access model in which the author pays. These predatory publishers are dishonest and lack transparency. They aim to dupe researchers, especially those inexperienced in scholarly communication. They set up websites that closely resemble those of legitimate online publishers, and publish journals of questionable and downright low quality. Many purport to be headquartered in the United States, United Kingdom, Canada or Australia but really hail from Pakistan, India or Nigeria.

Some predatory publishers spam researchers, soliciting manuscripts but failing to mention the required author fee. Later, after the paper is accepted and published, the authors are invoiced for the fees, typically US\$1,800. Because

research is disappearing. Now there is a journal willing to accept almost every article, as long as the author is willing to pay the fee. Authors, rather than libraries, are the customers of open-access publishers, so a powerful incentive to maintain quality has been removed.

Perhaps nowhere are these abuses more acute than in India, where new predatory publishers or journals emerge each week. They are appearing because of the market need — hundreds of thousands of scientists in India and its neighbouring countries need to get published to earn tenure and promotion.

Here, the problem is not just with the publishers. Scientists themselves are also to blame. Many are taking unethical shortcuts and paying for the publication of plagiarized or self-plagiarized work.

Honest scientists stand to lose the most in this unethical quagmire.

When a researcher's work is published alongside articles that are plagiarized, that report on conclusions gained from unsound methodologies or that contain altered photographic figures, it becomes tainted by association. Unethical scientists gaming the system are earning tenure and promotion at the expense of the honest.

The competition for author fees among fraudulent publishers is a serious threat to the future of science communication. To compete in a crowded market, legitimate open-access publishers are being forced to promise shorter submission-to-publication times; this weakens the peer-review process, which takes time to do properly.

To tackle the problem, scholars must resist the temptation to publish quickly and easily.

**SCIENTIFIC LITERACY

FRAUD.**

什麼是Open Access期刊 (Wikipedia)

Open access (OA) is a set of principles and a range of practices through which research outputs are distributed online, free of cost or other access barriers. With open access strictly defined (according to the 2001 definition), or libre open access, **barriers to copying** or **reuse** are also reduced or removed by applying an **open license** for **copyright**.

The main focus of the open access movement is "**peer reviewed research literature**." Historically, this has centered mainly on print-based academic journals.

continue-

Whereas conventional (non-open access) journals cover publishing costs through access tolls such as subscriptions, site licenses or pay-per-view charges, open-access journals are characterized by **funding models** which do not require the reader to pay to read the journal's contents. Open access can be applied to all forms of published research output, including peer-reviewed and non peer-reviewed academic journal articles, conference papers, theses, book chapters, monographs, and images.

Money Issue

掠奪性期刊特性 (<https://predatoryjournals.com/>)

1. Charging **exorbitant rates** for publication of articles in conjunction with **a lack of peer-review or editorial oversight.**
2. Notifying authors of fees only **after acceptance.**
3. Targeting scholars through **mass-email spamming** in attempts to get them to **publish** or **serve** on editorial boards.
4. **Quick** acceptance of low-quality papers, including hoax papers.
5. Listing scholars as **members of editorial boards** without their permission or not allowing them to resign.

continue-

NCHU

6. Listing **fake scholars as members** of editorial boards or authors.
7. Copying the visual design and language of the **marketing materials** and websites of legitimate, established journals.
8. Fraudulent or improper use of **ISSNs**.
9. Giving false information about the **location** of the publishing operation.
10. Fake, non-existent, or mis-represented **impact factors**.

"Now, we all are Challenge to face the COVID -19- We are restart our works to be safe and avoid COVID -19"

Dear Dr. H Ho,

We are very lucky to contact an eminent researcher like you!!

Sorry for bothering several times but we honourably needs your support this time kindly respond this Email Dr.

I am Olivier T Catrina Editorial Manager of Annals of Pediatric Research. We are planning to release our journal upcoming Trending Issue is on or before 18th September, 2020.

As we know that, in this pandemic situation is not the right time to over burden you by asking you to contribute a full length manuscript.

So, we humbly request you to submit **2 pages Editorial, 150 Words Clinical Images, Letter to Editor or Short communications** to this kind issue of our journal.

Research, Review and Case Reports are also welcome to this issue.-There is no specific topic for this issue it completely depends on your current research work.

Kind Note: We have to be needed your support immediately -We are anticipating to receiving your submission to this E-mail as an attachment as soon as possible. If not possible kindly invite your friends and colleagues for this issue.

Kindly submit your manuscript to this Email as an attachment as soon as possible.

We are looking forward for your valuable manuscript submissions.

Best Regards,
Olivier T. Catrina
Editorial Manager

Dear Professor,

Greetings from Sryahwa Publications!!!

It is our immense pleasure to invite you and your research allies to submit manuscript for [Annals of Microbiology and Infectious Diseases](#), which is focused to publish the quality research work in the fields of **Microbiology and Infectious Diseases**.

We publish all kind of original, research articles, review articles, short communications, Letter to Editor Etc.

We whole heartedly invite you to submit your articles/papers to amid@sryahwpublications.com

We request you to submit the manuscripts on or before **30-9-2020**.

For any queries feel free to contact us.

Thank you

Best Regards,

Christiana Lawrence
Journal Manager
Annals of Microbiology and Infectious Diseases

Dear Ho Lin,

Greetings from [Clinical Sciences Research and Reports](#)

In case you missed my previous email, our editorial office is interested in featuring your article in the upcoming issue of our journal. This would be a great opportunity for you as we are offering **open access** discount on the processing fee.

We would be grateful if you could kindly submit a 1-2page editorial/mini review/commentary/ or you can submit a research article/review/case report on any of your interested topic for our upcoming issue.

Note: Response given to this mail or submitted manuscripts before **September 28, 2020** will get **50% discount on publication charges**

Kindly respond back within 48hrs regarding your submission.

Dear Professor,

I am writing on the behalf of the [Journal of Veterinary Medicine and Animal Sciences](#) (Impact Factor 2.2). Based upon your expertise, I would like to invite you to contribute a manuscript (research/review/case report) for publication in our journals upcoming issue (Volume 3; Issue 1).

If your research paper is ready and looking towards publication, I am requesting you to consider our journal to globalize your research work. It will be a great honor for us to publish your eminent research work in our Journal.

Publication charges will be waived off, if you submit your manuscript on or before Sept 30, 2020. (DOI and Processing charges are applicable)

Please feel free to ask for more information about our journal.

If you have any questions, please reply to this email.

Thank you, best wishes for your ongoing works.
